If you have a question about Trust Name, then please ask Paul. Ask a question Do you not know a financial term? # **A B C D E F G I J K L M N O P Q R S T U V W X Y Z**Quick answer code (QR) is a type of two-dimensional barcode that can be read with specific QR barcode readers and most mobile phone cameras. The code is made of small black squares and rectangles that are arranged in a square pattern on a white background that codes for text, URL or other information. How does the quick response code (QR) work? Unlike previous versions of linear barcodes, 2-D QR codes can be read vertically or horizontally because each contains an alignment model. In addition, this extra size gives QR codes the ability to contain more information. Companies can use QR codes to display large amounts of information about their products or consumers directed to online resources using relatively small and simple graphics. This process of directing a traditional print audience to an online destination is also known as hardlinking or hyperlinking objects. Let's say XYZ is trying to spread the word about their new technological products and consumers headed to a site dedicated to a new product launch. As part of a new marketing strategy, they decide to buy advertising space on city buses. As an innovative approach, they decide to put only a photo of the gadget with theQR next to it containing the company's URL for the product web page and a link to buy the product. This is done in the hope of attracting curious consumers who will see the advertisement with the QR code, taking a photo of the codetheir smartphone, and be directed to the web page of the gadget. All product information could be accessed by the consumer using their smartphone camera and internet browser. This way, Company XYZ is able to advertise more efficiently and also monitor how many visitors their website receives from their marketing campaign that uses the QR code. I mean, I can see how well their advertising campaign is working immediately and on a continuous basis with a high precision rate. Why Quick Response (QR) Code Matter? Quick Response Codes (QR) allow companies or anyone with a quick mass communication use to display vast amounts of information in a simple design that can be read using a normal camera phone or smartphone. With more and more people using smartphones every day, using QR codes seems to be an emerging marketing and advertising medium. With the display of information using QR codes, companies and advertising agencies have another tool to direct consumers to online destinations and further allow interaction with a brand., their smartphones or other QR code readers. Technology can be used to provide useful information for people at large events, tourists in museums or cities, or companies looking to promote products or ideas. In InvestingAnswers, all our content is verified for accuracy by Paul Tracy and our team of certified financial experts. We are proud of quality, research and transparency, and appreciate your feedback. Below you will find answers to some of the most common questions of the reader on Quick Response (QR) Code. If you have a question about Quick Response (QR) Code, then please ask Paul. Ask a question Do you not know a financial term? › **A B C D E F G I J K L M O P Q R S T U V W X Y Z**Securities are held in the street name when the name of the broker, not the individual owner, is listed on the certificate. Almost all titles held in brokerage accounts are held in the street name. How it worksJob name? Although a security is held on the street name, all rights and benefits of owning security are transferred to the owner. For example, you decide to buy 100 Stock XYZ shares. Call your broker to EasyTrade and give her your order. Find 100 shares of XYZ, but instead of transferring the stock certificate into your name, EasyTrade is listed as the owner. Easy The trade then assigns all property rights to you as the "profit owner". They update you on the value of your "good property" through your monthly or quarterly statements. In many cases, instead of going to the market to find your 100 shares of XYZ, your broker just allocate 100 shares from EasyTrade existing inventory. In this way, trade takes place quickly and with minimal paperwork. Why on Street Name Matter? Keeping your titles in the street name allows your broker to trade faster and more easily than if each certificate had to be put in the name of the owner. All transactions and property chains can be carried out electronically. Imagine how long the trades would be necessary if the certificates of physical stock of a seller were to be returned to the issuer (the company), put in the name of the new buyer, and then physically delivered to the new buyer. In fact, if you want to have the physical possession of a stock certificate, your broker often charge a fee for additional expenses. In addition, having your titles in the street name puts weight on your broker to keep stock certificates safe so you don't have to worry about them being lost or stolen.
